

Speakers Bureau  
UNIVERSITY OF WISCONSIN-MADISON

# “Using Physics to Understand Cancer Treatments”

“Wisconsin Science Festival”

Sherman & Ruth Weiss Community Library  
Thursday, November 2nd, 2017

6:30 p.m. at 10788 State Highway 27/77 Hayward, Wisconsin 54843

Free and Open to the Public

## Emily Ehlerding

Graduate Student

School of Medicine and Public Health

Emily Ehlerding is a PhD Student in the Medical Physics department. She earned her bachelor's degrees in chemistry and physics from Manchester University in Indiana (she's not cool enough to be from the U.K.) Now she works on developing imaging methods for understanding cancer and its treatments. She wants to teach once she graduates and help other people love science as much as she does!

Host a UW-Madison speaker at your next event.
